

**Tri-County FireSafe Working Group**  
**Application for Assistance with a Fuel Modification Project**  
**For the Creation of a Disaster Resistant Landscape**

---

I understand the maximum amount available per project is based on the following formula:

Project costs are matched on a 50%/50% basis.

The grant amount awarded will be based on a 50%/50% split of the total project cost.

Example: Project amount= \$3,000 = \$1,500 grant money + \$1,500 grantee match.

Second entry or expansion of projects, if approved, will be on a 50%/50% maximum match.

Work on this project must be completed within 6 months of the project start date.

**Landowner Responsibility:**

1. Complete this application form and submit it to:

**Tri-County FireSafe Working Group**  
**Paul Spengler**  
**221 Breckenridge**  
**Helena, MT 59601**

2. Meet with a Tri-County approved contractor or inspector to complete the Home Evaluation Form and develop the project plan.
3. Once approved, ensure the completion of project work as described
4. Ensure debris/slash cleanup is accomplished using the agreed upon method:  
A. Burning      B. Chipping      C. Removal from property
5. Notify Tri-County FireSafe Working Group upon project completion.
6. Agree to maintain this fuel modification for a minimum of 10 years or until you no longer own this property.

**It is understood that maintenance is my responsibility.**

Reimbursement will be made by Tri-County FireSafe Working Group upon project completion and the inspection approval.
